

## HELPING THE EARTH REST EASIER.

We felt the world needed to quit sleeping with one eye open – worrying about the future. So we created smarter mattress products and a better production process to help. At every step, we're saving energy, preserving natural resources and keeping harmful emissions out of the ground and air. We're even turning plastic waste into viable raw materials. Just imagine how refreshed the earth will feel tomorrow.

### **Proposition 65 compliant**

Our bedding products are Proposition 65 compliant. We do not contaminate water sources with harmful carcinogens or chemicals during our manufacturing processes.

### **Safety**

Safety has always been Milliken & Company's number one priority. Our facilities are Voluntary Protection Program (VPP) certified, ensuring we go above and beyond OSHA requirements by maintaining injury rates below national averages. All safety incidents are reviewed in detail to determine countermeasures and prevent recurring accidents.

### **Zero waste to landfill**

Milliken & Company set a goal to eliminate all waste to landfill by 2025. Our Gillespie plant set the example in 2021 by sending zero waste to landfill.

### **Recycled content**

Milliken & Company continues to research and develop opportunities to increase the recycled content in our products. In 2021, the Gillespie plant recycled an estimated 60,000 lbs. of fabric into usable material through its internal regrind process.
